Cameron Adsett's Slough Built ID19

Tuesday, September 16 2008 @ 09:53 PM NZST

Cameron's car is based in Wellington and is an early first front circa 1960/1961 and still in regular use. The ds must be a popular topic of conversation in Cameron's flat, as flatmate Joe is also an enthusiast and looking to purchase an early single headlight car in the near future. Hopefully Cameron will report back soon with some more detail on his vehicle, in the meantime enjoy the images and thought that has gone into the background settings.
