You may recall the issues Mike has had with the gearbox in his DS23 IE Automatique

In total frustration Mike approached Harry Martens in Netherlands, ( [www.ds-vitesse.com](http://www.ds-vitesse.com) ) purchased a fully rebuilt Borg Warner 35 gearbox and had it shipped to New Zealand.

This week Mike had the car in the workshop to have the gearbox fitted.

In the email which contained the above photos there was this sentence:

"Well the transmission is in and running very nicely. No whine, good changes and a swift kickdown. Should have been there a year ago, but at least I am there now."

Well done Mike and well done Harry Martens, obviously the Citroen DS gearbox expert!!
